

## 3M 4229P VHB Adhesive Tape

3M 4229P VHB Adhesive Tape is an acrylic form tape that features a pressure-sensitive, high-performance acrylic adhesive. This adhesive tape is perfect for mounting Alloy LED's aluminum and polymer channels to a smooth, flat surface. This VHB (very high bond) tape features strong holding power to a variety of materials, good temperature performance, and good solvent resistance.

### Application:

1. Be sure that the channel and mounting surface are clean and dry before application.
2. Peel the 3M tape off the roll and adhere to the channel with firm pressure (the tape's adhesive property is activated by pressure).
3. Peel the red liner off the 3M tape and adhere the channel to the mounting surface with firm pressure.

## TECHNICAL INFORMATION

<b>Operating Temp. (long term)</b>	157°F max.
<b>Adhesive types</b>	Red liner side: AR7 acrylic Non-liner side: DS acrylic
<b>Width</b>	0.30 in.
<b>Thickness</b>	0.16 in.
