

3M 9731 Silicone Tape for Wet Location LED Tape Light

3M 9731 Double Coated Tape has a firm, silicone pressure sensitive adhesive coated on one side and a high performance acrylic adhesive coated on the other. This adhesive tape is perfect for adhering wet location LED tape light to a surface. The silicone adhesive features strong holding power to various silicone surfaces, good temperature performance and good solvent resistance.

Application:

1. Be sure that the tape light and mounting surface are clean and dry before application.
2. Peel the brown backing off the side of the tape marked "A" in the image. Adhere to the mounting surface with firm pressure.
3. The side of the tape marked "B" in the image sticks to the tape light. Expose the adhesive by peeling off the clear backing.

TECHNICAL INFORMATION

Operating Temp. (long term)	250°F max.
Adhesive types	Silicone, 3M 350
Width	0.37 in.
Thickness	0.03 in.
