

DC Plug Accessories

DC Plug Extension Cable

Adapter Splice Cable - Male

3-Way DC Plug Splitter Cable

DC Plug Accessories connect directly to Alloy LED products with DC plugs, like the Polara™ LED Puck Light. The DC Plug Splitter Cables allow multiple puck lights to connect to a Plug-In Adapter. The DC Plug Extension Cable creates an extension between a puck light and a Plug-In Adapter or between a puck light and DC Plus Splitter Cable. The lead wires of the Adapter Splice Cable can be soldered to an LED Tape Light so that it can be powered by a Plug-In Adapter.
