

Casambi® Compatible Wireless PIR 2-Button Dimmer Wall Switch

INSTRUCTIONS

For a sensor to work with the Casambi network, you must configure you network to use control hierarchy.

1) On the Network's main page, select "More"

2) Select "Network setup"

3) Select "Control options"

4) Make sure that the option "Use control hierarchy" is on and select "Done" (Select "Cancel" if the option is already on)

5) Select "Back"

6) Select "Nearby devices"

INSTRUCTIONS (CONTINUED)

7) Look for the sensor you want to pair and select it

8) Select "Add to (network)"

9) Wait until it gets paired (about 10 seconds) and then select "Back"

10) Now select the "Sensors" menu

11) You will see the sensors paired with the network, select the one that you want to configure

12) Rename it to a name of your choice and scroll until you see the "Presence Sensor" section

INSTRUCTIONS (CONTINUED)

13) Select "Not in use" to start configuring the sensor

14) Select "Not in use" to see and select the options

15) Select the control type for your sensor, and the menu will automatically go back one step

16) Select "Presence scenes"

17) Select the scene(s) to be activated by the sensor

18) When all the scenes are selected, select "Done"

INSTRUCTIONS (CONTINUED)

19) Select "Linger time" to configure the time out after the last detection until lights turn off

20) Select "Fade Time" to configure the transition time between activated and off state

21) Select "Done" to save the configuration
